Dear Dr. Mothibeli Pita,

Greetings

Thank you for attending the conference and supporting us in making the conference successful.

The purpose of this mail is to establish an advisory board to provide guidance and advice to Scisynopsis LLC on matters related to organize Scientific and Engineering conferences.

As you know, Scisynopsis LLC has completed first series of conferences and put step ahead towards next series with the aim Synoptic Approach to Foster Research and we would be very glad if you could also take part in building our success by accepting our request in being our Advisory Board Member as your support towards our Organization will be very helpful and help us to grow towards great success

With your experience, we want you to be our mentor and act as a representative of our Organization to form a better community for all the young Researchers out there.

Your participation as an advisory board member is voluntary, and you are free to withdraw your participation at any time without any penalty or loss of benefits.

Look forward to hearing from you.

With Regards,
